Health Sciences Research Days 2010

Instructions for Presenters

1. The poster boards on which your posters will be mounted measure 4-feet tall x 6-feet wide. Posters cannot exceed these dimensions.

2. Only Velcro can be used to secure posters to the poster boards – NO PUSH PINS. We ask that all participants provide their own Velcro.

3. Poster boards will be available for you to start posting an hour before your session begins. Please mount your poster at the board bearing your assigned poster number. This is the only way that judges and visitors can locate your entry.

4. Each presenter should be stationed at his/her own poster and ready to discuss the entry with judges and visitors.

A full program for both days – including dates, times, and the location of all poster presentations – is available on the Health Sciences Research Days 2010 website. Go to http://tulane.edu/asvpr/research-days-main.cfm, then click on “Schedule of Events”.

To view each abstract submitted, go to http://tulane.edu/asvpr/research-days-main.cfm, then click on “Accepted Abstracts”. Entries are listed alphabetically, by the first author’s last name. Click on an author’s name and you will be linked to his/her one-page abstract.

We encourage everyone in the Tulane University community to attend as much as possible, not only to support your colleagues who are presenting, but also to see the amazing research that is going on all around you!
