Responsible Conduct of Research

Publications

a global commitment to public health
• Authorship
• Acknowledging contributors
• Conflicts of interest
• Overlapping publications

www.icmje.org
Authors

• Authorship credit should be based on
  1) substantial contributions to conception and design, acquisition of data, or analysis and interpretation of data; AND
  2) drafting the article or revising it critically for important intellectual content; AND
  3) final approval of the version to be published; AND
  4) Agreement to be accountable for all aspects of the work.
Credit Inflation

More and more scientists are sharing credit as co-authors on research papers, with a sharp increase in reports whose author counts exceed 1,000 people.

1,400 scientific papers

THE WALL STREET JOURNAL.
Authors

• Determine authorship as early as possible (first, second, and last authors)
• No honorary authorship
• No ghost authorship
Writing Support

• No ghostwriting
• Modest writing support is generally OK
• Writing support should be acknowledged
Acknowledgements

• Contributions do not justify authorship (e.g., “clinical investigators”)

• Contribution should be described (e.g., “collected data” or “provided and cared for study patients”)

• Must give written permission to be acknowledged.
Conflicts of Interest

- Potential Conflicts of Interest Related to Individual Authors' Commitments
- Potential Conflicts of Interest Related to Project Support
Overlapping Publications

- > 10% overlap
- Salami publications (LPU: Least Publishable Units)
- Dual submissions
Predatory Journals

- *Not* in MEDLINE
- Beall’s List: http://scholarlyoa.com/
NIH Public Access Policy

When and How to Comply

1. Preparing a manuscript
   - Address copyright
   - show me

2. Accepted for publication
   - Post it to PubMed Central and track it in My NCBI
   - show me

3. Reporting to NIH
   - Include PMCID in citations
   - show me
