Tulane University Authorization for Release of Protected Health Information and Revoke Authorization

SCOPE OF POLICY

This policy applies to Tulane University Medical Group, its participating physicians and clinicians, and all University employees and business units who provide management, administrative, financial, legal, and operational support to or on behalf of Tulane University Medical Group and have been designated as part of the Tulane University HIPAA Health Care Component.

STATEMENT OF POLICY

The Tulane University Health Care Component must obtain a written authorization from a patient prior to using or disclosing of protected health information (PHI) for the purposes described in the implementation section of this policy and in the Tulane University Notice of Privacy Practices (the “Notice”) or any joint notice with respect to organized healthcare arrangements in which Tulane University Medical Group participates (“Joint Notice”). Requests by Tulane University Medical Group patients relating to information maintained by a hospital should be referred to the hospital.

IMPLEMENTATION OF POLICY

Authorization for uses and disclosures of protected health information (PHI) must be obtained for:

1) Uses and disclosures outside of treatment, payment, and health care operations, unless otherwise permitted by law or the Notice or Joint Notice as applicable;

2) Uses and disclosures created for research (when required pursuant to the policy Uses and Disclosures of Protected Health Information for Research, GC-012);

3) Psychotherapy notes except:

   a) To carry out treatment, payment, or health care operations:
      i) Use by the originator of the notes for treatment;
      ii) Use or disclosure in training programs in which trainees, students, or practitioner in mental health learn under supervision to practice or improve their skills in group, joint, family, or individual counseling; or
      iii) Use or disclosure by a facility to defend a legal action or other proceeding brought on by the individual.

   b) Use and disclosure with respect to oversight of the originator of the notes.
“Psychotherapy notes” means: notes recorded (in any medium) by a physician or clinician who is a mental health professional documenting or analyzing the contents of a conversation during a private counseling session or a group, joint, or family counseling session that are separated from the rest of the individual’s medical record. Psychotherapy notes exclude medication prescription and monitoring, counseling session start and stop times, the modalities and frequencies of treatment furnished, results of clinical tests, and any summary of the following items; diagnosis, functional status, the treatment plan, symptoms, prognosis and progress to date.

4) Deceased patient records, unless fifty (50) years have elapsed since the individual’s death. In such cases the health information is no longer subject to HIPAA and is no longer considered protected health information. Accordingly, no authorization is required to use or disclose such health information.

Other authorization or consent requirements may apply, in accordance with the policy on Sensitive Information, GC-023, or Billing Audits, GC-024.

The provision of treatment to an individual may not be conditioned on signing an authorization except for:
1) Research-related treatment; and
2) Health care that is solely for the purpose of creating information for disclosure to a third party.

An individual may revoke an authorization in writing (see Attachment D) except to the extent that:
1) The facility has taken action in reliance thereon; or
2) If an authorization was obtained as a condition of obtaining insurance coverage.

PROCEDURE:

1) In general, all written authorization must be obtained using the authorization forms in this policy (see Attachment A, Attachment B, or Attachment C). However, any signed form presented by a patient or his/her representative that contains the same information as the form in Attachment A, B, or C is acceptable.

2) Every signed authorization must be documented and retained for a minimum of six (6) years.

3) An authorization for use of PHI may not be combined with any other document to create a compound authorization, except as follows:
   a) In accordance with policy Uses and Disclosures of Protected Health Information for Research, GC-012, an authorization for the use and disclosure of PHI created for research may:
      i) be combined with any other type of written permission for the same research study, including another authorization or a research informed consent;
ii) combine conditioned and unconditioned authorizations for research as a single document, so long as the authorization clearly differentiates between the conditioned and unconditioned research components and clearly allows the individual to opt in to the unconditioned research activities; and

i) include future research as a purpose of the research authorization, so long as the I.R.B., in its discretion, determines that the future purposes have been described in such a way that an individual would understand that his or her PHI could be disclosed for future research.

b) An authorization for use or disclosure of psychotherapy notes may only be combined with authorization for use or disclosure of psychotherapy notes.

c) An authorization in accordance with this policy, other than an authorization for a use or disclosure of psychotherapy notes, may be combined with any other authorization except when the provision of treatment or payment has been conditioned on the provision of one of the authorizations.

2) HIPAA requires reasonable protocols designed to verify the identity and authority of the requestor. A covered entity may reasonably rely on documentation, statements, and representations that on their face meet the applicable requirements (examples – affidavit notarized, birth certificate, death certificate is reasonable proof. According to L.A. R.S. 40:1299.96, in the case of a deceased patient, the executor of the will, the administrator of the estate, the surviving spouse, the parents, or the children of the deceased patient all have a right to obtain a copy of the patient’s medical records after providing a signed authorization for the release of records.

3) An authorization for the use and disclosure of PHI for research must be drafted and approved in accordance with the policy on Uses and Disclosures of Protected Health Information for Research, GC-012.

INDIVIDUAL AUTHORIZATION

Patient Name: _______________________________  ID Number: __________________

We understand that information about you and your health is personal, and we are committed to protecting the privacy of that information. Because of this commitment, we must obtain your written authorization before we may use or disclose your protected health information for the purposes described below. This form provides that authorization and helps us make sure that you are properly informed of how this information may be used or disclosed. Please read the information below carefully before signing this form.

USE AND DISCLOSURE COVERED BY THIS AUTHORIZATION

A representative of Tulane University Medical Group must answer these questions completely before providing this authorization form to you. Do not sign a blank form. You or your personal representative should read the descriptions below before signing this form.

Who will disclose the information? The person(s) or class of persons authorized to disclose the information are described below.

Who will use and/or receive the information? The person(s) or class of persons authorized to receive the information are described below.

What information will be used or disclosed? The descriptions below should be in enough detail so that you (or any organization that must disclose information pursuant to this authorization) can understand what information may be used or disclosed.

What is the purpose of the use or disclosure? The purposes for which the information will be used or disclosed are described below. The words, “at the request of the individual,” are a sufficient description of the purpose when a patient initiates the authorization and chooses not to provide any further explanation of the purpose.

When will this authorization expire? The date or event that will trigger the expiration of this authorization should be described below.
SPECIFIC UNDERSTANDINGS

By signing this authorization form, you authorize the use or disclosure of your protected health information as described above. This information may be re-disclosed if the recipient(s) described on this form is not required by law to protect the privacy of the information, and such information is no longer protected by federal health information privacy regulations.

You have a right to refuse to sign this authorization. Your healthcare, the payment for your health care, and your healthcare benefits will not be affected if you do not sign this form. You also have a right to receive a copy of this form after you have signed it.

If you sign this authorization, you will have the right to revoke it at anytime, except to the extent that the hospital has already taken action based upon your authorization. To revoke this authorization, please write to the manager of the specific site where you have been seen.

SIGNATURE

I have read this form and all of my questions about this form have been answered. By signing below, I acknowledge that I have read and accepted the above.
