"NIH Application Process and Funding Opportunities, with Emphasis on DMID Programs"

Adriana Costero-Saint Denis, PhD
NIH/NIAID

This seminar will provide an overview of the NIH funding system, NIAID funding opportunities, the vector biology program, and resources for investigators.

Dr. Costero-Saint Denis was born and raised in Mexico City, Mexico. During her career she has focused on the study of arthropod vectors of infectious human diseases. She is currently the Vector Biology Program Officer at NIAID/NIH.

This seminar is co-sponsored by the Vector Borne Infectious Diseases Research Center
