TRMD 7000 Tropical Medicine Seminar

Professor: Latha Rajan, MBBS

Credits: 1

Semester(s) Offered: Fall, Spring

Course Description:

Tropical Medicine Seminar is designed as a journal club, with the specific goal of training students to develop skills in critically evaluating and effectively presenting relevant scientific literature. Each student is expected to present at least one article to the class from recent tropical medicine literature, and to attend and actively participate during presentations delivered by other students.
Learning Objectives:

By the conclusion of the course, it is expected that the student will be able to:
1. Research independently and select a scientific article that meets the criteria set by the course
2. Evaluate scientifically and critique published articles
3. Present effectively articles to a scientific audience
4. Discuss the strengths and weaknesses of study design, methodology, and interpretation of results demonstrated by the articles presented in seminar
