Mathematics Requirement for School of Science and Engineering Students

Candidates for the B.S. and B.S.E. degrees in the School of Science and Engineering must take a minimum of 32 credits of science and mathematics selected from at least two different disciplines: cell and molecular biology, chemistry, ecology and evolutionary biology, earth and environmental sciences, mathematics, neuroscience, physics and psychology. At least one of these courses must include a laboratory.

A minimum of six credits of mathematics is required. Any two Mathematics courses numbered 1210 and above may be used to satisfy this requirement. However the combination of MATH 1150 and MATH 1160 may count as one course toward this requirement. Students may satisfy all, or part, of the requirement with the appropriate AP score(s). A score of 4 or 5 on the Advanced Placement AB exam or a score of 3 on the BC exam earns credit for MATH 1210. A score of 4 or 5 on the BC exam earns credit for MATH 1210 and MATH 1220.

Departments may recommend, or require, particular mathematics or science courses for their majors, and students are advised to consult the major department’s listing in the current course catalog.

*For the most up to date information regarding course requirements please look at the current Tulane University Undergraduate Course Catalog.
