Design Symposium in Honor of Professor David Rice  
Friday April 13, 2012 ♦ 3 PM  
Woldenberg Art Center - Freeman Auditorium  
Reception in Woodward Way Breezeway following conclusion of the symposium

You are invited to a special Biomedical Engineering Design Symposium to honor Professor David Rice, who is retiring in June after 31 years as an esteemed member of the Biomedical Engineering faculty. Professor Rice has been teaching BME Team Design for the last twenty years. In that time he has shepherded our students through the design process as they have conceptualized, designed, constructed and delivered devices to individuals with disabilities in the New Orleans community.

Former students and colleagues who are actively involved in the design process and design education will speak at the Symposium - so we are looking forward to this as an engaging and educational event. We sincerely hope that you will join us -- the Symposium is on April 13, and it’s the same weekend as French Quarter Fest [http://www.fqfi.org/](http://www.fqfi.org/) so hotel rooms will fill up quickly.
