WELCOME TO THE ANNUAL BIOMEDICAL ENGINEERING CAPSTONE TEAM DESIGN SHOW

Saturday, April 16, 2016
10:00 AM -- 12:00 Noon

Qatar Ballroom (Room #212)
Lavin-Bernick Center
Tulane Uptown Campus

Join us for presentations of team design projects by our Biomedical Engineering Seniors: the Class of 2016. The projects to be shown address healthcare-related needs in the domains of pain management, reconstructive surgery, hospital patient tracking, cardiac health monitoring in low-resource settings, and surgical simulation & training.

This year's design teams:

Neaux Pain
AbdoVision
encountOR
Health.e
Simsation

Biomedical Engineering Team Design (BMEN 4030-4040) constitutes the major design experience based on the knowledge & skills acquired in earlier course work and incorporating appropriate engineering standards & multiple realistic constraints.

Support of the David A. Rice Design Fund, Venture Well, and the National Science Foundation (NSF) are gratefully acknowledged.

Light Refreshments provided
