| Wednesday, January 14 | Current Status and Future Directions of Delivery Across the BBB: Challenges and Advances | Ed Neuwelt, MD  
Professor of Neurology & Neurosurgery  
Oregon Health & Science University | Boggs 104 | Dr. Jean-Pyo Lee           |
| Wednesday, January 21 | NO SPEAKER                                                             |                                                                                                   |          |                           |
| Wednesday, January 28 | NO SPEAKER                                                             |                                                                                                   |          |                           |
| Wednesday, February 4 | Song as a signal of cognitive ability                                 | Elizabeth Derryberry, PhD  
Assistant Professor of Ecology & Evolutionary Biology  
Tulane University | Boggs 104 | Dr. Jill Daniel            |
| Wednesday, February 11| NO SPEAKER                                                             |                                                                                                   |          |                           |
| Wednesday, February 18| NO SPEAKER -- Ash Wednesday                                           |                                                                                                   |          |                           |
| Wednesday, February 25| Disrupted Autonomic Control as a Mechanism that Links Inflammation and Metabolic Dysregulation | Christoph Buettner, MD, PhD  
Associate Professor of Medicine and Neuroscience  
Mount Sinai School of Medicine | Boggs 104 | Dr. Franck Mauvais-Jarvis |
| Wednesday, March 4    | Presynaptic Ion Channels at an Auditory Synapse                       | Hai Huang, PhD  
Assistant Professor of Cell & Molecular Biology  
Tulane University | Boggs 104 | Dr. Jeffery Tasker         |
| Thursday, March 12    | Synaptic Health: Implications for Cognitive Aging                     | John Morrison, PhD  
Professor of Neurosciences; Geriatrics & Palliative Medicine  
Mount Sinai Hospital | SOM 6065 | Dr. Ricardo Mostany  
Co-Presented by the Center of Aging |
| Wednesday, March 18   | Central actions of androgens in glucose homeostasis and diabetes      | Franck Mauvais-Jarvis, MD, PhD  
Price-Goldsmith Professor of Nutrition  
Professor of Medicine  
Tulane University | Boggs 104 | Dr. Jill Daniel            |
| Wednesday, March 25   | Role of Neuronal Isoform of Nitric Oxide Synthase in Brain Microvascular Endothelial Cells | Prasad Katakam, MD, PhD  
Assistant Professor of Pharmacology  
Tulane University | Boggs 104 | Dr. Jill Daniel            |
| Wednesday, April 1    | NO SPEAKER -- Spring Break                                             |                                                                                                   |          |                           |
| Wednesday, April 8    | DAT’s Got My Attention: Non-Vesicular Dopamine Release and ADHD        | Randy Blakely, PhD  
Professor of Pharmacology & Psychiatry  
Center for Molecular Neuroscience  
Vanderbilt University | Boggs 104 | Dr. Milton Hamblin         |
| Wednesday, April 15   | TBA                                                                    | Elezer Masliah, MD  
Professor of Neurosciences and Pathology  
University of California San Diego | Boggs 104 | Dr. Jean-Pyo Lee           |
| Thursday, April 23    | TBA                                                                    | Kerryessler, MD, PhD  
Professor of Psychiatry & Behavioral Sciences  
Emory University | TBA      | Dr. Jeff Tasker            |
