Tulane School of Science and Engineering Seminars

Compiled by the Science and Engineering Honor Society
(SEHS)

Week of April 22nd

Monday
“Chemical crystallography”
Bart Khar – New York University
4pm, Jones 102
Chemistry

Tuesday
“Discrete Morse Theory and Persistent Homology”
Pawel Dlotko – University of Pennsylvania
12:45, Tilton 305
Neuroscience

Thursday
“Singularity Formation in Nonstrictly Hyperbolic Equations”
Katarzyna Saxton – Loyola University
1 pm, Tilton 305
PDE

Friday
“Retinal Homeostasis: A tale of two secretases”
Mike Boulton – University of Florida
4 pm, Jones 102
Cell and Molecular Biology
“Ionic Ecology--the secret life of sodium”
Michael Kaspari – Oklahoma
11 am, LBC 212
Ecology and Evolutionary Biology

“The Stress & "Strength" Hypothesis: Advancing a Gender-Specific, Culturally-Responsive Explanation for Delays in Black Women's Preventive Care”
Angela Black – University of Illinois
12pm, Caroline Richardson Ana Many Lounge
Psychology
