Tulane School of Science & Engineering Seminars
(Open to the Public)
Compiled by the Science and Engineering Honor Society (SEHS)

/ Spring 2019 /

Week of February 4

Monday
Title TBA
Craig Martens, PhD – UC-Irvine
4:00 PM, Jones 102
Chemistry

Tuesday
“Limit theorems for eigenvectors of adjacency and normalized Laplacian for random graphs”
Minh Tang, PhD – Johns Hopkins University
3:30 PM, Dinwiddie 102
Mathematics

Wednesday
“Chudnowsky’s Conjecture for a general set of points in PNk”
Abu Thomas – Tulane University
3:00 PM, Gibson 310
Mathematics

Title TBA
Speaker TBA
4:00 PM, LBC Stibbs
Neuroscience

Friday
“Using integrative Bayesian approaches to examine ecological and evolutionary influences on disease dynamics”
Graziella DiRenzo, PhD – UC-Santa Barbara
11:00 AM, LBC 203
Ecology and Evolutionary Biology

“Blue Carbon Science and Policy: Advances and Challenges”
Gail Chmura, PhD – McGill University
12:00 PM, SELAB 206*
Earth and Environmental Sciences

“Next Generation Metabolic Models for Photosynthesis”
Nanette Boyle, PhD – Colorado School of Mines
2:00 PM, Boggs 240
Chemical and Biomolecular Engineering

“Results on some local energy solutions to the Navier-Stokes equations”
Zach Bradshaw – Tulane University
3:30 PM, Greenbaum House
Mathematics

* Based on room/time from last semester, current semester information not posted
